UniTorq **UTQ Series**

Quarter-Turn Electric Actuators

The rugged **UTQ Actuator** is the result of the accumulation of experience and expertise acquired from over 20 years of valve actuation. With a unique combination of a compact, efficient design utilizing proven electric actuator mechanics and the latest technological enhancements, the **UTQ** is ideally suited for a wide variety of industrial and commercial applications.

UniTorq **UTQ Series**

Quarter-Turn Electric Actuators

Features & Construction

Sizes: UTQ-1.5 / UTQ-3.0 / UTQ-6.0

- ♦ Motor — split-phase, capacitor driven; 15 minute duty; 115/230v
- ♦ Gearing — hardened steel, machine cut spur gears
- ♦ Enclosure — Nema 4/4X
- ♦ Manual Operation — wrench operated drive shaft, or optional handwheel
- ♦ Limit Switches — 1 each, SPDT at each end of travel
- ♦ Common Options:
 - ♦ Positioning controls (4-20mA)
 - ♦ Anti-condensation or low temperature heaters
 - ♦ 2 additional limit switches
 - ♦ Other options available — consult your UniTorq sales representative

Sizes: UTQ-10 thru UTQ-120

- ♦ Motor — squirrel cage induction motor with embedded thermostat
- ♦ Main Power — Single phase 110/220V; Three phase 220/440/460/480V
- ♦ Housing — durable, compact and corrosion-resistant Aluminum alloy.
- ♦ Enclosure — standard rating to IP68 (submergence to 25 feet for 72 hours)
- ♦ Position Indication — continuous (0-100%) dial-type indicator;
Optional LCD display with integral control unit
- ♦ Limit Switches — 2 each, N.O./N.C., easily screwdriver adjustable
- ♦ Torque Switches — for Open and Close directions
- ♦ Manual Operation — side-mounted handwheel with automatic declutch lever for ease of operation
- ♦ Anti-condensation space heater — thermistor type
- ♦ Common Options:
 - ♦ Integral control unit with non-intrusive push buttons, LED lamps, mechanically and electrically interlocked reversing contactor, phase discriminator, monitor relay and double-sealed terminal block
 - ♦ Automatic phase correction also available
 - ♦ Explosion Proof Enclosure to Class1 / Div. 1 or 2 / Group C or D (Exd IIBT4)
 - ♦ Actuators meet AWWA requirements for Electric Motor Operators
 - ♦ Other options available — consult your UniTorq sales representative

Operational and Dimensional Data

Models UTQ-1.5 to UTQ-6.0 Data Chart

UTQ-Series	Max. Output Torque	Operating Time (90°) 60/50Hz	Output Drive	VA Rating		Rated Current (A)		Weight

About UniTorq

UniTorq's basic principle is our complete dedication to our customers needs through the manufacturing and distribution of superior actuation products to insure our continued commitment to dependable service and support.

These activities are carried out in a process that is continually improving to implement the latest technological advances and to satisfy the changing needs of our customers.
